

Port of Vancouver USA

Environmental Management System (EMS) Environmental Policy Wellhead Protection Area

The Port of Vancouver (Port) has selected the wellhead protection area as its fence line (Environmental Management System). The Port supplies potable water, fire suppression, wash down and irrigation water to several areas of our property.

The Port of Vancouver believes that environmental stewardship and economic development can co-exist. We take a proactive approach to managing our natural resources and minimizing our impact on the environment. To minimize environmental impacts concerning our activities, products and services, we shall:

- Meet or exceed regulatory requirements to which relate to the EMS environmental aspects.
- Include the consideration of environmental issues in all business strategies and initiatives.
- Ensure that protection of the environment is firmly embedded in the Port's culture.
- Prevent pollution, reduce waste and maximize the use of sustainable resources in the construction and operation of facilities and delivery of our services.
- Consider the wider global impact of Port, tenant, customer, supplier and stakeholder activities.
- Educate, train and motivate employees to carry out tasks in an environmentally responsible manner and ensure that a continuous professional development strategy remains core to our business goals.
- Protect air quality, water resources and land managed by the Port through deliberate and proactive efforts in our operations.

The Port is committed to continual improvement in all aspects of our environmental performance.
